PROFESSIONAL CUTTING EQUIPMENT

AIRMaster PRO
Data Sheet

AIRMaster PRO

Air blowing table

The professional AIRMaster PRO blowing table allows to move very heavy materials on the tabletop without any effort. It is perfect solution for hemming carpets and rugs.

The fans used generate a strong air stream that lifts the carpet above the table. The air cushion created in this way reduces friction, which allows the material to move smoothly along the hemming machine.

It is possible to run only some of the blowers depending on needs.

AIRMaster PRO is built on a light but very stiff frame. Thanks to the modular design, it is possible to create tables of various sizes.

Main features that distinguish the PRO version:

- 14 cm thick table chambers without pipe system
- Much larger air flow compared to AIRMaster
- Blower power adjustment

BASIC PARAMETERS

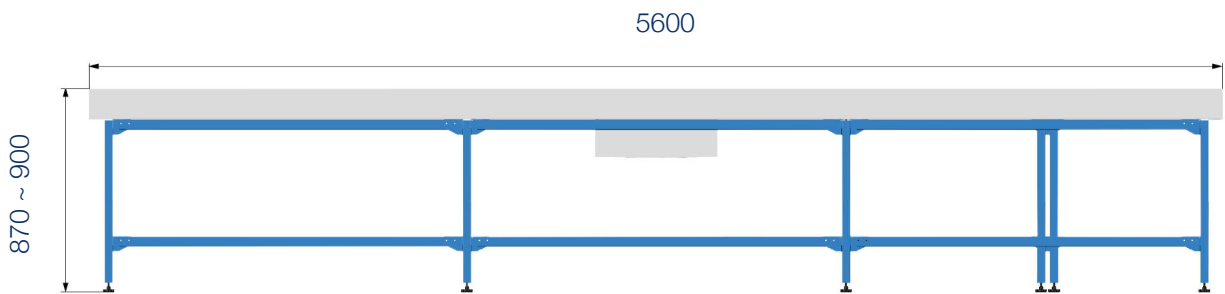

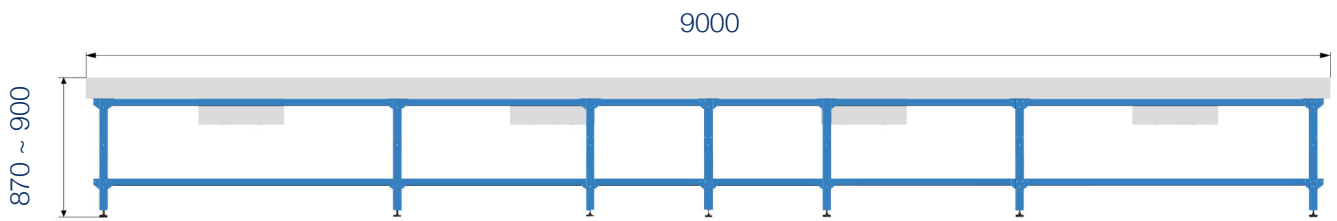

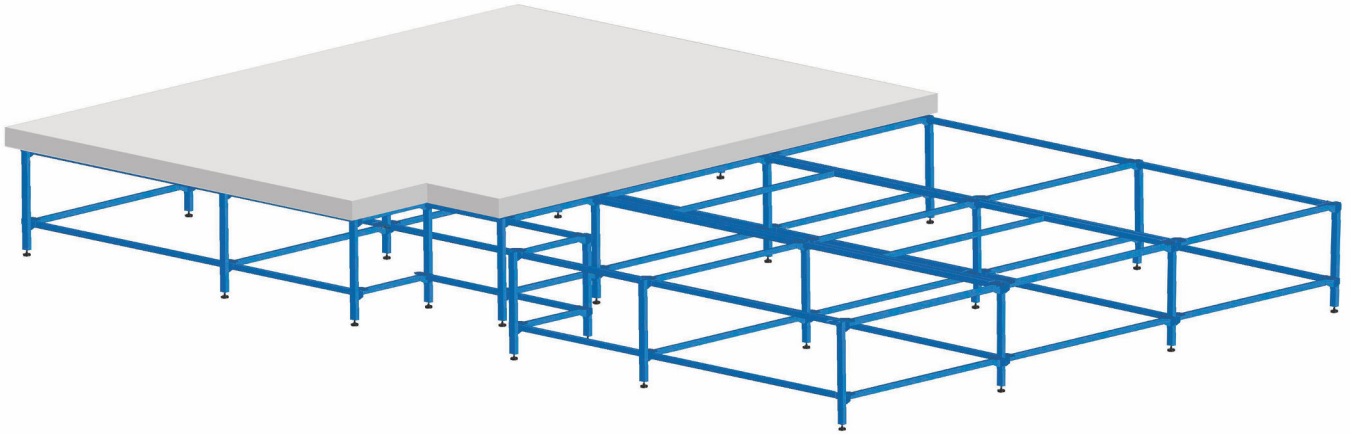

Width	any
Length	any
Height	86-90 cm, regulated
Frame	powder-coated steel profiles
Air chambers	14 cm thick air chambers, 2 mm PVC edges
Power	1000 W per fan
Voltage	380 V / 115 V

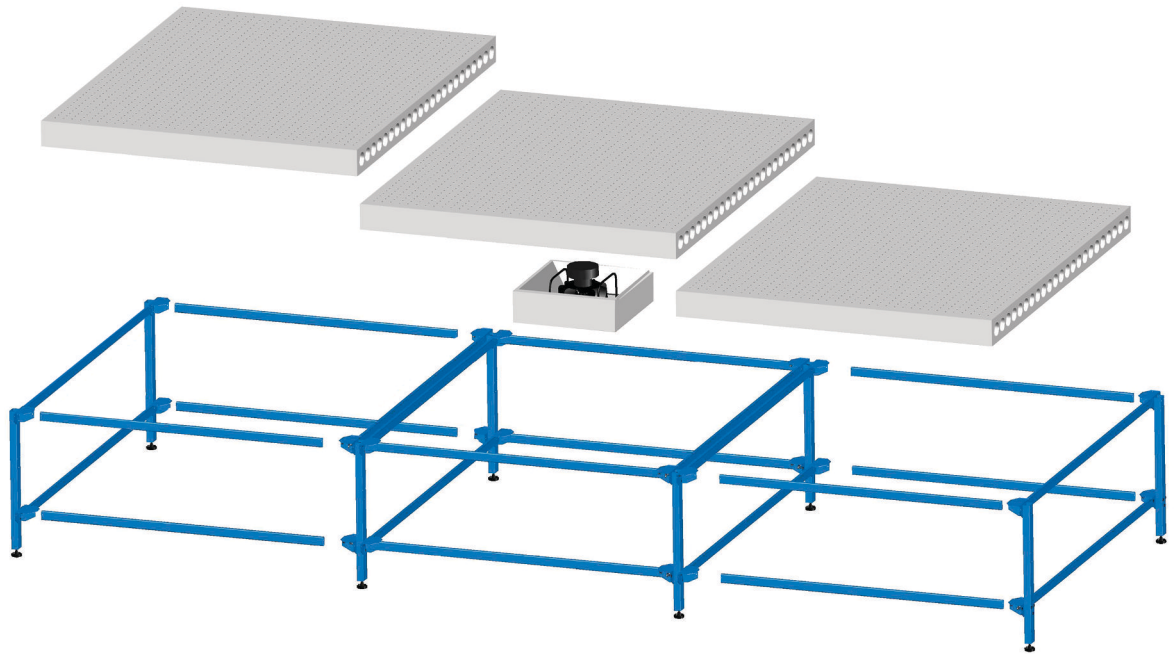

OPTIONAL

Cutout for a hemming machine	any sizes, any quantity
Edge strips	strips blocking the material from sliding off the table
